Hi Maunik,
We have a business need to provide trend analysis on approximately 20 sites like SOCMGM that use replication to their respective DR sites. Below is a sample of what we run daily but this is just a point in time view into the lag times. We need more of a trend analysis where we can identify sites that continue to have lag time issues. We have IBM Insight as well as Spectrum Control but I do not see a way to track lag time with either tool.

ID	NAME	MASTER	AUX	PRIMARY	STATUS	CNT	FREEZE TIME	LAG (min)	TZ
00	VMRDG_2_ksysanc	ANCMGM	DDCANCDRMGM	master	consistent_copying	25	2022 02/24 04:27:28	02	US/Alaska
