Data Management

Data Resiliency

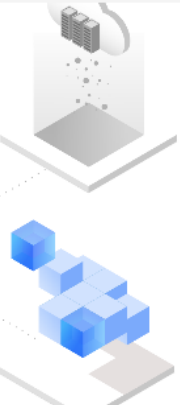

Licensing calculator

Data Management

Manage your secondary data protection environments from one place.

Data Resiliency

Identify assets and resources and ensure they're backed up. Detect threats, stop attacks quickly, and facilitate recovery in case of an event.

Licensing calculator

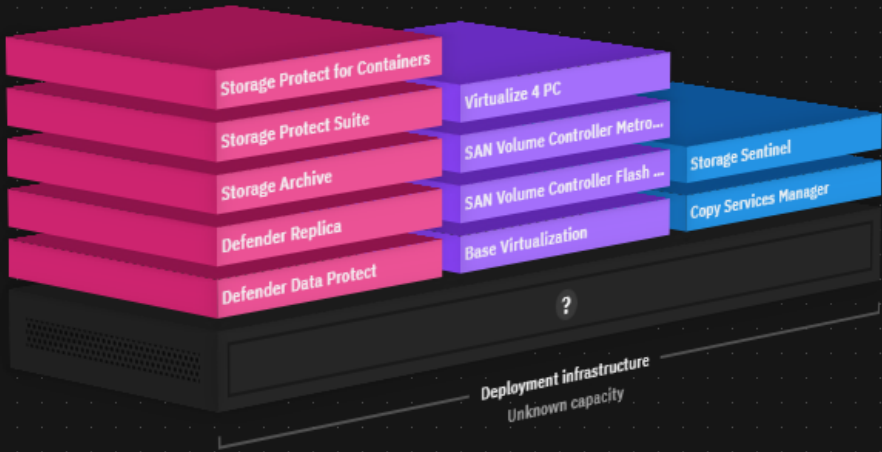

Helps your business stay compliant and optimize the usage of different IBM Storage Defender solutions by calculating the correct Defender Resource Units (RUs) you require.

CONFIGURE

# New configuration

On-prem deployment ▾

Your starting point below is the minimum Storage Defender configuration. Select services from the list for inclusion - services are inserted by category with a default size, but can be customized by clicking on corresponding blocks. When complete, save and/or export for future use.

244 RUs  
of Storage Defender
