1.Fibre Channel switch (FabricConnection), or select an option.

2.Select the power cord according to your needs.

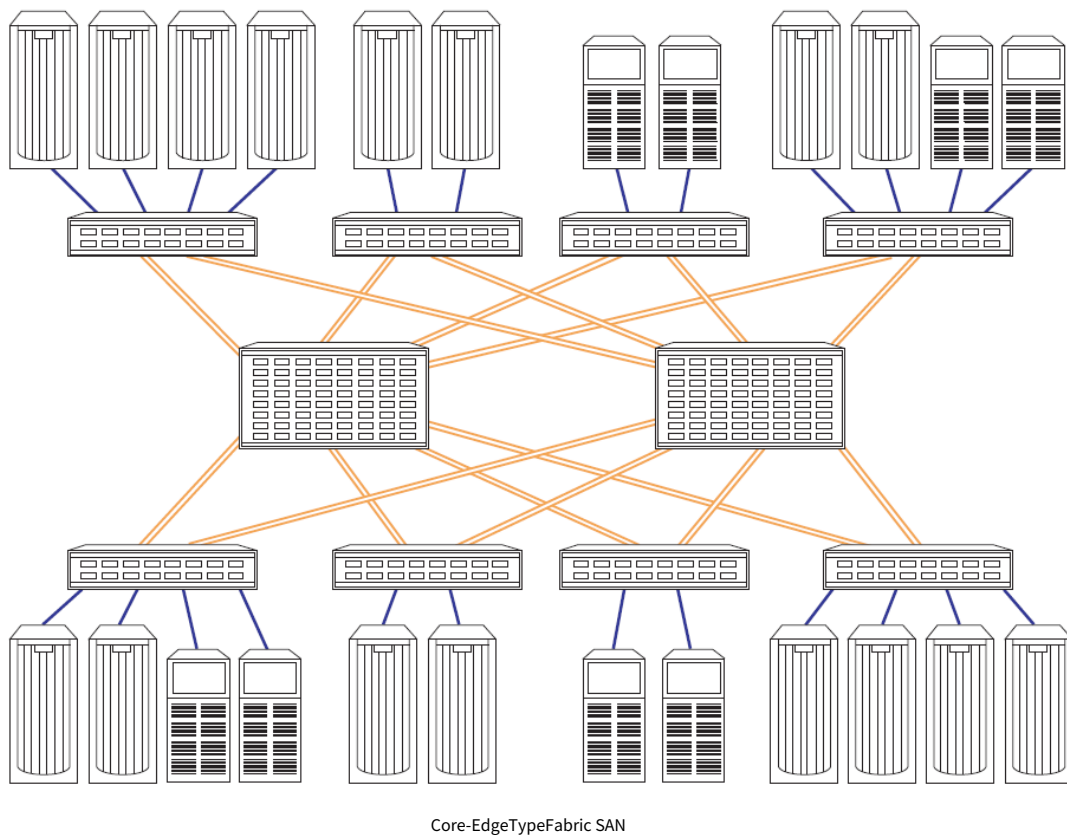

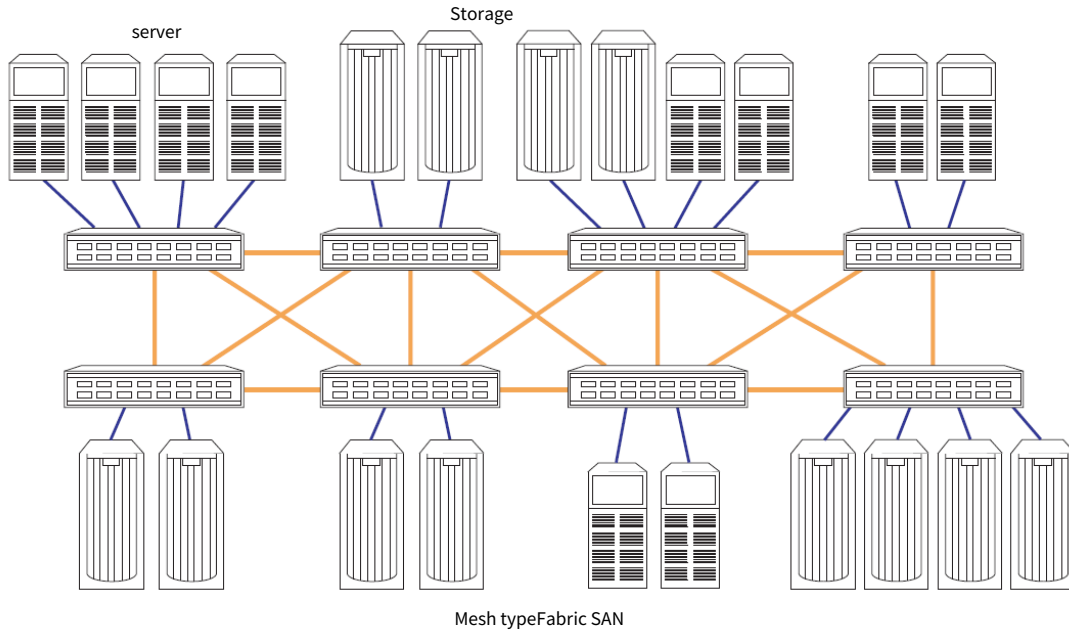

3.Please select the service for the product you are interested in.

Please contact us separately regarding installation and maintenance services for products not listed here.

- ◆ When building large-scale or complex configurations, we recommend using our storage design consultation service. Please contact us for details.
- ◆ HPE SAN (Storage Area Network)For details, see below.WebPlease refer to the site. <http://www.hpe.com/jp/ja/storage/networking.html>

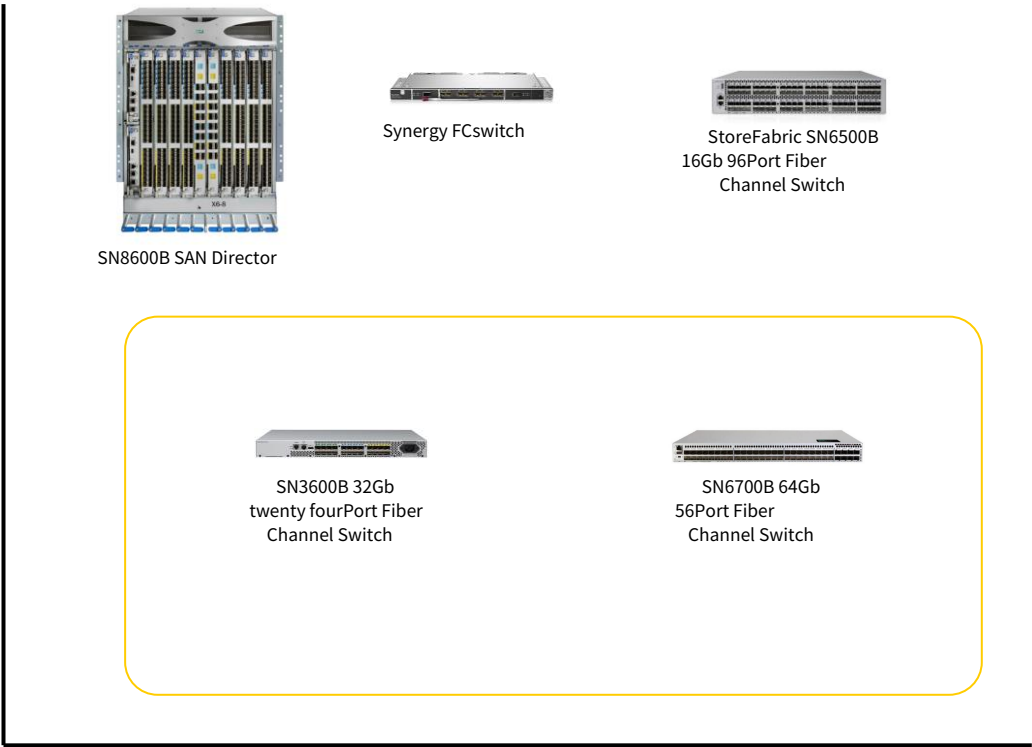

[SANExample of an expanded configuration

As with general networks, the number of devices in a Fibre Channel switch increases. SANIt is possible to expandCore-EdgeBy using a multi-stage configuration called a "system configuration," it is possible to minimize business interruptions due to an increase in equipment, and also to minimize the need for restructuring. SANThis reduces the management and operational costs.

OVERVIEW

Fibre Channel Switch

StoreFabric SN3600B 32Gb 24portFCSwitch Product Overview

SN3600B is the 6th generation 32Gb Entry-level Fibre Channel compatible SAN switch.

1U In the case, twenty-four ports are standard and 8 ports are available in the entry model. There are higher-end models that can use ports, and depending on the license, 8 ports are active in the 16-port model. Bundled or optional supplementary service software Power Pack+ The functionality can be expanded.

power supply	Rating: 90~264 VAC (47 Hz ~ 63 Hz)			
Power consumption	76.52 W (24 Fully equipped port, 32 Gbps SWL (When using a transceiver))			
size (H×W×D)	4.3 cm × 42.9 cm × 30.7 cm			
weight	5.76 kg (Power1 (Basic equipment, excluding transceivers))			
Form Factor	1U (From the back (cooling fan side) to the front (FC port side), and the power connector (FC port side), 19 inch, EIA Compliance)			

OVERVIEW

Fibre Channel Switch

StoreFabric SN6700B 64Gb 56portFCSwitch Product Overview

SN6700B is the latest FC SAN Providing technology Brocade GEN7E equipped with a chip, 64Gb/s Compatible with next-generation mid-range FC SAN It's a switch.

No. 6 Approximately 100 times faster than the previous generation chip 40% It improves latency. NVMe over Fabric By combining it with compatible products, you can maximize its high-performance storage capabilities.

The physical port is 48 pieces SFP56 Port and 8 pieces SPD-DD It has a port and comes standard with twenty four ports are activated and a port upgrade license allows up to 64 FC It can be expanded to up to 1000 ports. 32Gb SFP28 or 64Gb SFP56 Short wavelength Secure The walkie-talkie twenty four 1 piece is included as standard.

Highly available storage requires SAN6600B 32Gb FCI recommend the switch

3PAR StoreServ, MSA Even if you have high-availability storage such as SAN, if the availability of switches, which are the core of the infrastructure, is poor, the storage performance and investment will be wasted.

So HP Eteeth, B Series SN6600B 32Gb FCI recommend a switch.

B Series FC The switch has been used by many users for many years and is recommended for customers who value a proven track record.

SN6600B 32Gb FC The switch includes hot-swappable power supplies and fans. This is standard equipment for all units. Therefore, in terms of fault tolerance, even if one power supply or fan fails and stops, operation will continue on the other power supply. On the other hand, a single power switch will stop operation, increasing the risk of business interruption.

In addition, recovery work can be done quickly. With a single power switch, the chassis needs to be replaced, and the settings have to be re-set, which takes time to recover. On the other hand, with a single power switch, the power supply can be hot-swapped. SN6600B 32Gb FC The switch can be quickly restored by replacing only the power supply unit.

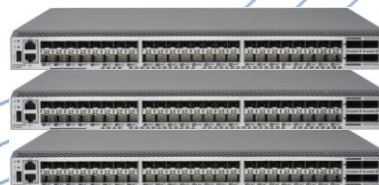

SN6600B 32Gb FC This resilience and rapid recovery allows the switch to SAN. This increases the availability of your infrastructure and maximizes the fault tolerance of your storage.

Eliminated infrastructure vulnerabilities
High availability SAN System completion

SN6600B 32Gb FC switch

- ✓ Implementation track record B series SAN switch
- ✓ Eliminate infrastructure vulnerabilities
- ✓ Maximize storage availability
- ✓ Maximize your investment
- ✓ Fast recovery

◆ **HPE** When connecting Fibre Channel between a disk array and a server product manufactured by HPE Made SAN This is a service product that performs configuration work on switch products. By purchasing and requesting this service in conjunction with the above installation service, SAN From hardware installation of switch products SAN We even handle the setup work.

◆ **HPE Made SAN** This applies when installing new switch products (box-type entry/mid-range class as mentioned above).

◆ **Service target HPE Made SAN Switch Products** 1 Supported service products for each unit 1 You need pieces.

◆ **This service applies to HPE Installation Services** Requires sales and service requests in conjunction with hardware installation.

◆ **This service is applicable to SAN** The operating environment for the connected server and the connected disk array are as follows:

Connected Server Hardware Integrity Server, ProLiant Server

Connection Server operating system HP-UX, Microsoft Windows Server, Red Hat Enterprise Linux, VMware ESXi

Disk arrays (all Fibre Channel SAN (applies to connections via 3PAR StoreServ series, StoreVirtual series, MSASeries

Other Fibre Channel SAN Connected products Tape autoloader, MSL Tape libraries, Storage File Controller

◆ **The work involves the following:**

- Customer specified SAN Checking requirements for build settings

- SAN Switch product basic settings

Management Port Network Settings (IP Address, Network Mask, SAN Switch name setting, Domain ID setting)

- SAN Switch product option license (Power Pack+ Application support and registration of bundled software)

- SAN Switch port settings (type, speed), SAN Zoning settings, SNMP Notification settings, Inter Switch Link Settings (including trunking)

- SAN Get switch configuration information

- Connection confirmation attendance

- SAN Switch Settings SAN Connection configuration diagram SAN Switch configuration file submission

◆ **Service hours**
